

Questions:

The term push and pop is related to the - a)array b)list c) stack d) all of the above
2. FizzBuzz

FIZZBUZZ Write a program that prints the numbers in the given range.

But for multiples of three print "Fizz" instead of the number and for the multiples of five print "Buzz".

For numbers which are multiples of both three and five print "FizzBuzz". Print a new line after each string or number.

Input Format First line will be the number of testcases, T. Next line will have T integers, denoted by N.

Output Format For each testcase, print the number from 1 to N. But follow the rules given in the problem statement.

Constraints

$$1 \leq T \leq 10$$

N is an integer.

WAP to get OS name and user name using Java

WAP to get data from db And put it in hashmap

WAP to get data from xml file and put it in hashmap

WAP to get data from csv file and put it in hashmap

WAP to get the count of radio buttons which is not selected in a page
